

Yogoda Satsanga Palpara Mahavidyalaya

Department of Computer Science

Session:-2019-2020

TEACHING PLAN

| Semester | Paper | Unit/Module | | Teacher | No. of lectures | To be completed by |
|------------|---|---------------|---|--|-----------------|-----------------------|
| Semester-1 | C1T1 : Programming Fundamentals using C/C++ | C Language | 1. Introduction to C | Mrs. Sova Pal (Bera) (Associate Professor) | | 1 st Month |
| | | | 2. Data Types, Variables, Constants, Operators and Basic I/O | | | 1 st Month |
| | | | 3. Expressions, Conditional Statements and Iterative Statements | | 30 | 2 nd month |
| | | | 4. Functions and Arrays | | | 2 nd month |
| | | | 5. Derived Data Types (Structures and Unions) | | | 3 rd month |
| | | | 6. Pointers References in C | | | 4 th month |
| | | C ++ Language | 1. Memory Allocation in C++ | | | 1 st Month |

| | | | | | | |
|--|--|------------|---|--|----|-----------------------|
| | | | 2. File I/O, Preprocessor Directives | | | 2 nd month |
| | | | 3. Using Classes in C++ | | | 3 rd month |
| | | | 4. Overview of Function Overloading and Operator Overloading | Mrs. Sova Pal (Bera) (Associate Professor) | | 4 th month |
| | | | 5. Inheritance, Polymorphism and Exception Handling | | | 5 th Month |
| | C1 P1 : Programming Fundamentals using C/C++ Lab | C Language | 1. Introduction to C | | | 1 st Month |
| | | | 2. Data Types, Variables, Constants, Operators and Basic I/O | | | 1 st Month |
| | | | 3. Expressions, Conditional Statements and Iterative Statements | Mrs. Sova Pal (Bera) (Associate Professor) | 30 | 2 nd month |
| | | | 4. Functions and Arrays | | | 2 nd month |
| | | | 5. Derived Data | | | 3 rd mon |

| | | | | | | |
|--|---|------------------------|--|--|----|---|
| | | | Types(Structures and Unions) | | | th |
| | | | 6. Pointers References in C | | | 4 th month |
| | | C ++ Language | 1. Memory Allocation in C++ | | | 1 st Month |
| | | | 2. File I/O, Preprocessor Directives | | | 2 nd month |
| | | | 3. Using Classes in C++ | | | 3 rd month |
| | | | 4. Overview of Function Overloading and Operator Overloading | Mrs. Sova Pal (Bera) (Associate Professor) | | 4 th month |
| | | | 5. Inheritance, Polymorphism and Exception Handling | | | 5 th Month |
| | C2T2 : Computer System Architecture | Digital Electronics | 1. Introduction Logic gates, boolean algebra, combinational circuits, circuit simplification, flip- flops and sequential circuits, decoders, multiplexers, registers, counters and memory units. | Mr. Arnab Chakraborty (SACT) | 30 | 1 st Month And 2 nd month |
| | | | 2. Data Representation and | | | 3 rd month |

| | | | | | | |
|--|--|---------------------------|---|--|----|---------------------------|
| | | | Basic Computer Arithmetic | | | And 4 th Month |
| | | Computer Architecture | Basic Computer Organization and Design | | | 1 st Month |
| | | | Central Processing Unit | Mr. Suman Mondal (Assistant Professor) | 30 | 2 nd month |
| | | | Memory Organization | | | 3 rd month |
| | | | Input-Output Organization | | | 4 th Month |
| | C2P2 : Computer System Architecture | Digital Experiment | 1. Design and implement a full adder circuit using NAND gates only. 2. Design and implement a J. K. flip-flop. 3. Design and implement a 4 bit adder using flip-flop. | Mr. Arnab Chakraborty (SACT) | 30 | 1 st Month |
| | | | 4. Design and | | | 2 nd mon |

| | | | | | | |
|--|--|-----------------------|---|--|----|---|
| | | | implement a 4 bit synchronous counter. 5. Design and implement a 8:1 multiplexer. 6. Design and implement a D flip-flop. | | | th |
| | | | 7. Design and implement a half subtractor using NAND gates only. 8. Design and implement a 3×8 decoder. 9. Design and implement a 8 bit parity generator. 10. Design and implement a two bit digital comparator. | | | 3 rd month And 4 th Month |
| | | Computer Architecture | Basic Computer Organization and Design | | | 1 st Month |
| | | | Central Processing Unit | Mr. Suman Mondal (Assistant Professor) | 30 | 2 nd month |
| | | | Memory | | | 3 rd month |

| | | | | | | |
|--|--|---|--|--|----|-----------------------|
| | | | Organization | | | th |
| | | | Input-Output Organization | | | 4 th Month |
| | GE-I T1 : Computer Fundamentals | Data Representation: | Number systems and character representation, binary arithmetic | | 50 | 1 st Month |
| | | Human Computer Interface | Types of software, Operating system as user interface, utility programs | | | 1 st Month |
| | | Devices | Input and output devices (with connections and practical demo), keyboard, mouse, joystick, scanner, OCR, OMR, bar code reader, web camera, monitor, printer, plotter | Mr. Suman Mondal (Assistant Professor) | | 2 nd month |
| | | Memory | Primary, secondary, auxiliary memory, RAM, ROM, cache memory, hard disks, optical disks | | | 3 rd month |
| | | Computer Organisation and Architecture | C.P.U., registers, system bus, main memory unit, cache memory, Inside a computer, SMPS, Motherboard | | | 4 th Month |
| | GE-I P1: Computer | MS Word | 1.Prepare a grocery | Mr. Suman | 50 | 1 st Month |

| | | | | | | |
|--|---------------------------|-----------------|--|------------------------------|--|-----------------------|
| | r Fundamentals Lab | | <p>list having four columns (Serial number, the name of the product, quantity and price) for the month of April, 06.</p> <p>2. Create a telephone directory.</p> <p>3. Design a time-table form for your college.</p> | Mondal (Assistant Professor) | | |
| | | | <p>4. XYZ Publications plans to release a new book designed as per your syllabus. Design the first page of the book</p> | | | 1 st Month |
| | | | <p>5. Wrapping of text around the image.</p> <p>6. Convert text to a table, using comma as delimiter</p> | | | 2 nd month |
| | | MS Excel | <p>1. Enter data in Excel Sheet</p> <p>2. A company XYZ Ltd. pays a monthly salary to its employees which consists of basic salary, allowances &</p> | | | 3 rd month |

| | | | | | | |
|--------------------|---------------------------------|-----------------------------|---|------------------------------|----|-----------------------|
| | | | deductions. | | | |
| | | | <p>3.Create Payment Table for a fixed Principal amount, variable rate of interests and time</p> <p>4.Use an array formula to calculate Simple Interest for given principal amounts given the rate of Interest and time</p> | | | 4 th Month |
| Semester-II | C3T: Programming in Java | Introduction to Java | <p>Java Architecture and Features, Understanding the semantic and syntax differences between C++ and Java, Compiling and Executing a Java Program, Variables, Constants, Keywords Data Types, Operators (Arithmetic, Logical and Bitwise) and Expressions</p> | Mr. Arnab Chakraborty (SACT) | 50 | 1 st Month |
| | | Arrays, Strings | Creating & Using Arrays (One | | | 2 nd month |

| | | | | | | |
|--|--|---|--|--|--|-----------------------|
| | | and I/O | Dimension and Multi-dimensional), Referencing Arrays Dynamically, Java Strings, Simple I/O using System out and the Scanner class, Byte and Character streams, Reading/Writing from console and files. | | | |
| | | Object-Oriented Programming Overview | Principles of Object-Oriented Programming, Defining & Using Classes, Controlling Access to Class Members, Class Constructors, Method Overloading, Class Variables & Methods, Objects as parameters, final classes, Object class, Garbage Collection. | | | 3 rd month |
| | | Inheritance, Interfaces, Packages, Enumerations, Autoboxing and Metadata | Inheritance: (Single Level and Multilevel, Method Overriding, Dynamic Method Dispatch, Abstract Classes), Interfaces and Packages, Extending interfaces and packages, Package and Class Visibility, Using | | | 3 rd month |

| | | | | | | |
|--|---------------------------------------|--|---|------------------------------|----|-----------------------|
| | | a | Standard Java Packages (util, lang, io, net), Wrapper Classes, Autoboxing/Unboxing, Enumerations and Metadata. | | | |
| | | Exception Handling, Threading, Networking and Database Connectivity | Exception types, uncaught exceptions, throw, built-in exceptions, Creating your own exceptions; Multi-threading. | | | 4 th Month |
| | | Applets and Event Handling | Java Applets: Introduction to Applets, Writing Java Applets, Working with Graphics, Incorporating Images & Sounds. Event Handling Mechanisms, Listener Interfaces | | | 4 th Month |
| | C3P: Programming in Java (Lab) | Introduction to Java | <ol style="list-style-type: none"> To find the sum of any number of integers entered as command line arguments To find the factorial of a given | Mr. Arnab Chakraborty (SACT) | 50 | 1 st Month |

| | | | | | | |
|--|--|--------------------------------|---|--|--|-----------------------|
| | | | <p>number</p> <p>3. To learn use of single dimensional array by defining the array dynamically.</p> <p>4. To learn use of lenth in case of a two dimensional array</p> <p>5. To convert a decimal to binary number</p> | | | |
| | | Arrays, Strings and I/O | <p>6. To check if a number is prime or not, by taking the number as input from the keyboard</p> <p>7. To find the sum of any number of integers interactively, i.e., entering every number from the keyboard, whereas the total number of integers is given as a command line argument</p> <p>8. Write a program that show working of</p> | | | 2 nd month |

| | | | | | | |
|--|--|--|--|--|--|-----------------------------|
| | | | <p>different functions of String and StringBuffer class like setCharAt (set Length (), append (), insert (), concat ()and equals ().</p> | | | |
| | | <p>Object-Oriented Programming Overview</p> | <p>9. Write a program to create a class with methods where distance is computed in terms of feet and inches, how to create objects of a class and to see the use of this pointer</p> <p>10. Write a program to show that during function overloading, if no matching argument is found, then java will apply automatic type conversions(from lower to higher data type)</p> <p>11. Write a program to show the</p> | | | <p>3rd month</p> |

| | | | | | | |
|--|--|--|--|--|--|-----------------------------|
| | | | <p>difference between public and private access specifiers. The program should also show that primitive data types are passed by value and objects are passed by reference and to learn use of final keyword</p> | | | |
| | | <p>Inheritance, Interfaces, Packages, Enumerations, Autoboxing and Metadata</p> | <p>12. Write a program to demonstrate the concept of boxing and unboxing.</p> <p>13. Create a multi-file program where in one file a string message is taken as input from the user and the function to display the message on the screen is given in another file (make use of Scanner package in this program).</p> <p>14. Write a program to create a</p> | | | <p>3rd month</p> |

| | | | | | | |
|--|--|--|--|--|--|-----------------------------|
| | | | <p>multilevel package and also creates a reusable class to generate Fibonacci series, where the function to generate fibonacci series is given in a different file belonging to the same package.</p> <p>15. Write a program that creates illustrates different levels of protection in classes/subclasses belonging to same package or different packages</p> | | | |
| | | <p>Exception Handling , Threading, Networking and Database Connectivity</p> | <p>16. Write a program that takes two numbers a and b as input, computes a/b, and invokes Arithmetic Exception to generate a message when the denominator</p> | | | <p>4th Month</p> |

| | | | | | | |
|--|--|-----------------------------------|--|--|--|-----------------------|
| | | | <p>is zero.</p> <p>17. Write a program to show the use of nested try statements that emphasizes the sequence of checking for catch handler statements.</p> <p>18. Write a program to demonstrate priorities among multiple threads.</p> | | | |
| | | Applets and Event Handling | <p>19. Write a program to demonstrate different mouse handling events like mouse Clicked (), mouse Entered (), mouse Exited (), mouse Pressed, mouse Released () and mouse Dragged ().</p> <p>20. Write a program to demonstrate different keyboard handling events.</p> <p>21. Write a program to generate a window without an applet</p> | | | 4 th Month |

| | | | | | | |
|--|---|---------------------|---|--|----|-----------------------|
| | | | window using main () function. | | | |
| | C4T: Discrete Structures | Introduction | Sets - finite and Infinite sets, uncountably Infinite Sets; functions, relations, Properties of Binary Relations, Closure, Partial Ordering Relations; counting - Pigeonhole Principle, Permutation and Combination; Mathematical Induction, Principle of Inclusion and Exclusion | Mr. Suman Mondal (Assistant Professor) | 33 | 1 st Month |
| | | Growth of Functions | Asymptotic Notations, Summation formulas and properties, Bounding Summations, approximation by Integrals | | | 2 nd month |
| | | Recurrences | Recurrence Relations, generating functions, Linear Recurrence Relations with constant coefficients and their solution, Substitution Method, Recurrence Trees, Master Theorem | | | 3 rd month |
| | | Graph | Basic Terminology, | Mrs. | 15 | 1 st Mon |

| | | | | | | |
|--|--|---------------------|---|--|----|------------------------------------|
| | | Theory | Models and Types, multigraphs and weighted graphs, Graph Representation, Graph Isomorphism, Connectivity, Euler and Hamiltonian Paths and Circuits, Planar Graphs, Graph Coloring, Trees, Basic Terminology and properties of Trees, Introduction to Spanning Trees | Sova Pal (Bera) (Associate Professor) | | th And 2 nd month |
| | | Prepositional Logic | Logical Connectives, Well-formed Formulas, Tautologies, Equivalences, Inference Theory | Mr. Suman Mondal (Assistant Professor) | 12 | 4 th Month |
| | GE 2 T : Introduction to Database System | Database | Introduction to database, relational data model, DBMS architecture, data independence, DBA, database users, end users, front end tools | Mrs. Sova Pal (Bera) (Associate Professor) | 60 | 1 st Month |
| | | E-R Modeling | Entity types, entity set, attribute and key, relationships, relation types, E- R diagrams, database design using ER diagrams | | | 2 nd month |
| | | Relation | Relational model | | | 3 rd mon |

| | | | | | | |
|--|---|----------------------------|--|--|----|-----------------------|
| | | al Data Model | concepts, relational constraints, primary and foreign key, normalization: 1NF, 2NF, 3NF | | | th |
| | | Structur ed Query Language | SQL queries, create a database table, create relationships between database tables, modify and manage tables, queries, forms, reports, modify, filter and view data. | | | 4 th Month |
| | GE2 P : Introducti on to Database System (Lab) | Structur ed Query Language | 1) Create a database having two tables with the specified fields, to computerize a library system of a Delhi University College. Library Books (Accession number, Title, Author, Department, Purchase Date, Price) Issued Books (Accession number, Borrower) | Mrs. Sova Pal (Bera) (Associate Professor) | 60 | 1 st Month |
| | | | 2) Create the following tables and answer the queries given below: Customer (Cust ID, email, Name, Phone, Referrer ID) Bicycle (Bicycle ID, Date Purchased, Color, | | | 2 nd month |

| | | | | | | |
|--------------|---------------------|--------|---|--|--|-----------------------|
| | | | Cust ID, Model No) Bicycle Model (Model No, Manufacturer, Style) Service (Start Date, Bicycle ID, End Date) | | | |
| | | | 3) Create the following tables, enter at least 5 records in each table and answer the queries given below. EMPLOYEE (Person_Name, Street, City) WORKS (Person_Name, Company_Name, Salary) COMPANY (Company_Name, City) MANAGES (Person_Name, Manager_Name) | | | 3 rd month |
| | | | 4) Create the following tables, enter at least 5 records in each table and answer the queries given below. Suppliers (SNo, Sname, Status, SCity) Parts (PNo, Pname, Colour, Weight, City) Project (JNo, Jname, Jcity) Shipment (Sno, Pno, Jno, Qunatity) | | | 4 th Month |
| Semester-III | C5T: Data Structure | Arrays | Single and Multi-dimensional Arrays, | | | 1 st Month |

| | | | | | | |
|--|---|--------------|---|------------------------------|----|-----------------------|
| | s | | Sparse Matrices (Array and Linked Representation) | | | |
| | | Stacks | Implementing single / multiple stack/s in an Array; Prefix, Infix and Postfix expressions, Utility and conversion of these expressions from one to another; Applications of stack; Limitations of Array representation of stack | Mr. Arnab Chakraborty (SACT) | 60 | 1 st month |
| | | Linked Lists | Singly, Doubly and Circular Lists (Array and Linked representation); Normal and Circular representation of Stack in Lists; Self Organizing Lists; Skip Lists | | | 2 nd month |
| | | Queues | Array and Linked representation of Queue, De-queue, Priority Queues | | | 2 nd month |
| | | Recursion | Developing Recursive Definition of Simple Problems and their implementation; Advantages and Limitations of Recursion; Understanding what goes behind | | | 3 rd month |

| | | | | | | |
|--|---------------------|-----------------------|--|-----------|----|-----------------------|
| | | | Recursion (Internal Stack Implementation) | | | |
| | | Trees | Introduction to Tree as a data structure; Binary Trees (Insertion, Deletion , Recursive and Iterative Traversals on Binary Search Trees); Threaded Binary Trees (Insertion, Deletion, Traversals); Height-Balanced Trees (Various operations on AVL Trees). Tree traversal techniques. | | | 3 rd month |
| | | Searching and Sorting | Linear Search, Binary Search, Comparison of Linear and Binary Search, Selection Sort, Insertion Sort, Bubble Sort, Quick Sort, Comparison of Sorting Techniques | | | 4 th month |
| | | Hashing | Introduction to Hashing, Efficiency of Rehash Methods, Resolving collision by Open Addressing, Coalesced Hashing, Separate Chaining, Dynamic and Extendible Hashing. | | | 4 th month |
| | C5P: Data Structure | Searching and | 1. Write a program to search an element | Mr. Arnab | 60 | 1 st month |

| | | | | | | |
|--|-------|--------------|--|--------------------|--|-----------------------|
| | s Lab | Sorting | <p>from a list. Give user the option to perform Linear or Binary search. Use Template functions.</p> <p>2. WAP using templates to sort a list of elements. Give user the option to perform sorting using Insertion sort, Bubble sort or Selection sort.</p> | Chakraborty (SACT) | | |
| | | Stacks | <p>3. Perform Stack operations using Array implementation. Use Templates.</p> | | | 1 st month |
| | | Linked Lists | <p>4. Implement Linked List using templates. Include functions for insertion, deletion and search of a number, reverse the list and concatenate two linked lists (include a function and also overload operator +).</p> <p>5. Implement Doubly Linked List using templates. Include functions for insertion, deletion and search of a number, reverse the list.</p> <p>6. Implement Circular</p> | | | 2 nd month |

| | | | | | | |
|--|--|-----------|---|--|--|-----------------------|
| | | | Linked List using templates. Include functions for insertion, deletion and search of a number, reverse the list. | | | |
| | | Queues | 7. Perform Queues operations using Circular Array implementation. Use Templates. 8. Create and perform different operations on Double-ended Queues using Linked List implementation. | | | 3 rd month |
| | | Recursion | 9. WAP to calculate factorial and to compute the factors of a given no. (i) using recursion, (ii) using iteration 10. (ii) WAP to display fibonacci series (i) using recursion, (ii) using iteration 11. WAP to calculate GCD of 2 number (i) with recursion (ii) without recursion | | | 4 th month |
| | | Trees | 12. WAP to create a Threaded Binary Tree as per in order traversal, and | | | 4 th month |

| | | | | | | |
|--|------------------------|-------------------------------|--|--|----|-----------------------|
| | | | <p>implement operations like finding the successor / predecessor of an element, insert an element, in order traversal.</p> <p>13. WAP to implement various operations on AVL Tree.</p> | | | |
| | C6T: Operating Systems | Introduction | <p>Basic OS functions, resource abstraction, types of operating systems– multiprogramming systems, batch systems , time sharing systems; operating systems for personal computers & workstations, process control & real time systems.</p> | Mrs. Sova Pal (Bera) (Associate Professor) | 60 | 1 st month |
| | | Operating System Organization | <p>Processor and user modes, kernels, system calls and system programs.</p> | | | 1 st month |
| | | Process Management | <p>System view of the process and resources, process abstraction, process hierarchy, threads, threading issues, thread libraries; Process Scheduling, non-pre-emptive and</p> | | | 2 nd month |

| | | | | | | |
|--|----------------------------|-------------------------|---|--|----|--|
| | | | pre-emptive scheduling algorithms; concurrent processes, critical section, semaphores, methods for interprocess communication; deadlocks. | | | |
| | | Memory Management | Physical and virtual address space; memory allocation strategies – fixed and variable partitions, paging, segmentation, virtual memory | | | 3 rd month |
| | | File and I/O Management | Directory structure, file operations, file allocation methods, device management. | | | 4 th month |
| | | Protection and Security | Policy mechanism, Authentication, Internal access Authorization. | | | 4 th month |
| | C6P: Operating Systems Lab | C/ C++ programs | 1. Write a program (using fork () and/or exec () commands) where parent and child execute: a) same program, same code. b) same program, different code. c) before terminating, the parent waits for the | Mr. Suman Mondal (Assistant Professor) | 50 | 1 st month And 2 nd month And 3 rd month And 4 th month |

| | | | | | | |
|--|--|--|--|--|--|--|
| | | | <p>child to finish its task.</p> <p>2. Write a program to report behaviour of Linux kernel including kernel version, CPU type and model. (CPU information)</p> <p>3. Write a program to report behaviour of Linux kernel including information on configured memory, amount of free and used memory (memory information).</p> <p>4. Write a program to print file details including owner access permissions, file access time, where file name is given as argument.</p> <p>5. Write a program to copy files using system calls.</p> <p>6. Write program to implement FCFS scheduling algorithm.</p> <p>7. Write program to implement Round Robin scheduling algorithm.</p> <p>8. Write program to implement SJF scheduling algorithm.</p> <p>9. Write program to</p> | | | |
|--|--|--|--|--|--|--|

| | | | | | | |
|--|------------------------|--|---|--|----|-----------------------|
| | | | calculate sum of n numbers using thread library. 10. Write a program to implement first-fit, best-fit and worst-fit allocation strategies | | | |
| | C7T: Computer Networks | Introduction to Computer Networks | Network definition; network topologies; network classifications; network protocol; layered network architecture; overview of OSI reference model; overview of TCP/IP protocol suite. | Mr. Suman Mondal (Assistant Professor) | 60 | 1 st month |
| | | Data Communication Fundamentals and Techniques | Analog and digital signal; data-rate limits; digital to digital line encoding schemes; pulse code modulation; parallel and serial transmission; digital to analog modulation;- multiplexing techniques- FDM, TDM; transmission media. | | | 1 st month |
| | | Networks Switching Techniques | Circuit switching; packets switching-connectionless datagram switching, connection-oriented | | | 2 nd month |

| | | | | | | |
|--|--|---|--|--|--|-----------------------|
| | | es and Access mechanisms | virtual circuit switching; dial-up modems; digital subscriber line; cable TV for data transfer. | | | |
| | | Data Link Layer Functions and Protocols | Error detection and error correction techniques; data-link control- framing and flow control; error recovery protocols- stop and wait ARQ, go-back-n ARQ; Point to Point Protocol on Internet. | | | 2 nd month |
| | | Multiple Access Protocol and Networks | CSMA/CD protocols; Ethernet LANS; connecting LAN and back-bone networks- repeaters, hubs, switches, bridges, router and gateways; | | | 3 rd month |
| | | Networks Layer Functions and Protocols | Routing; routing algorithms; network layer protocol of Internet- IP protocol, Internet control protocols. | | | 3 rd month |
| | | Transport Layer Functions and Protocols | Transport services- error and flow control, Connection establishment and release – three way handshake; | | | 4 th month |
| | | Overview of Applications | Overview of DNS protocol; overview of WWW & HTTP | | | 4 th month |

| | | | | | | |
|--|-------------------------------|-------------------|--|--|----|--|
| | | on layer protocol | protocol. | | | |
| | C7P: Computer Networks Lab | | <ol style="list-style-type: none"> 1. Simulate Cyclic Redundancy Check (CRC) error detection algorithm for noisy channel. 2. Simulate and implement stop and wait protocol for noisy channel. 3. Simulate and implement go back n sliding window protocol. 4. Simulate and implement selective repeat sliding window protocol. 5. Simulate and implement distance vector routing algorithm 6. Simulate and implement Dijkstra algorithm for shortest path routing. 7. Experiments for capturing and analyzing data packets using Wire Shark. • Experiments on filtering packets • Experiments on inspecting packets | Mr. Suman Mondal (Assistant Professor) | 60 | 1 st month And 2 nd month And 3 rd month And 4 th month |
| | SEC-1T: | Unit I- | Introduction to | Mr. | 40 | 1 st |

| | | | | | | |
|--|-----------------------|-----------|--|------------------------------------|--|-----------------------|
| | Programming in MATLAB | | Programming: Components of a computer, working with numbers, Machine code, Software hierarchy | Suman Mondal (Assistant Professor) | | month |
| | | Unit II- | Programming Environment: MATLAB Windows, A First Program, Expressions, Constants, Variables and assignment statement, Arrays | | | 1 st month |
| | | Unit III- | Graph Plots: Basic plotting, Built in functions, Generating waveforms, Sound replay, load and save. | | | 2 nd month |
| | | Unit IV- | Procedures and Functions: Arguments and return values, M-files, Formatted console input-output, String handling. | | | 2 nd month |
| | | Unit V- | Control Statements: Conditional statements: If, Else, Else-if, Repetition statements: While, for loop. | | | 3 rd month |
| | | Unit VI- | Manipulating Text: Writing to a text file, Reading from a text file, Randomising and sorting a list, | | | 4 th month |

| | | | | | | |
|--|---|-------------------------------|--|--|----|---|
| | | | searching a list. | | | |
| | | Unit VII- GUI Interface | Attaching buttons to actions, Getting Input, Setting Output. | | | 4 th month |
| | SEC1P: Software Lab Based on MatLab | Matlab Program ming | <p>1. A supermarket conveyor belt holds an array of groceries. The price of each product (in pounds) is [0.6, 1.2 ,0.5, 1.3] ; while the numbers of each product are [3, 2 ,1 ,5]. Use MATLAB to calculate the total bill.</p> <p>2. The sortrows(x) function will sort a vector or matrix X into increasing row order. Use this function to sort a list of names into alphabetical order.</p> <p>3. The —identity matrix is a square matrix that has ones on the diagonal and zeros elsewhere. You can generate one with the eye() function in MATLAB. Use MATLAB to find a matrix B, such that</p> | Mr. Suman Mondal (Assistan t Professo r) | 60 | 1 st month And 2 nd month |

| | | | | | | |
|--|--|--|--|--|--|--|
| | | | <p>when multiplied by matrix $A = \begin{bmatrix} 1 & 2 \\ -1 & 0 \end{bmatrix}$ the identity matrix $I = \begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix}$ is generated. That is $A * B = I$.</p> <p>4. Create an array of N numbers. Now find a single MATLAB statement that picks out from that array the 1,4,9,16,...,VNth entries, i.e. those numbers which have indices that are square numbers.</p> <p>5. Draw a graph that joins the points (0,1), (4,3), (2,0) and (5,-2).</p> | | | |
| | | | <p>6. Calculate and replay 1 second of a sinewave at 500Hz with a sampling rate of 11025Hz. Save the sound to a file called "ex35.wav". Plot the first 100 samples.</p> <p>7. Calculate and replay a 2 second chirp. That is, a sinusoid that steadily increases in frequency with time,</p> | | | <p>3rd month And 4th month</p> |

| | | | | | | |
|--|--|--|--|--|--|--|
| | | | <p>from say 250Hz at the start to 1000Hz at the end.</p> <p>8. Build a square wave by adding together 10 odd harmonics: 1f, 3f, 5f, etc. The amplitude of the nth harmonic should be 1/n. Display a graph of one cycle of the result superimposed on the individual harmonics.</p> <p>9. Write a function called FtoC (ftoc.m) to convert Fahrenheit temperatures into Celsius. Make sure the program has a title comment and a help page. Test from the command window with: i. FtoC(96) ii. lookfor Fahrenheit iii. help FtoC</p> <p>10. Write a program to input 2 strings from the user and to print out (i) the concatenation of the two strings with a</p> | | | |
|--|--|--|--|--|--|--|

| | | | | | | |
|--|-----------------------------------|---|---|--|----|-----------------------|
| | | | <p>space between them, (ii) a line of asterisks the same length as the concatenated strings, and (iii) the reversed concatenation. For example: i. Enter string 1: Mark ii. Enter string 2: Huckvale iii. Mark Huckvale iv. ***** v. elavkcuHkraM</p> | | | |

| | (Lab) | | <p>operations in Octave/MATLAB like addition, multiplication, division and exponentiation.</p> <p>2. Perform elementary logical operations in Octave/MATLAB (like OR, AND, Checking for Equality, NOT, XOR).</p> <p>3. Create, initialize and display simple variables and simple strings and use simple formatting for variable.</p> <p>4. Create/Define single dimension / multi-dimension arrays, and arrays with specific values like array of all ones, all zeros, array with random values within a range, or a diagonal matrix.</p> <p>5. Use command to compute the size of a matrix, size/length of a particular</p> | (Assistant Professor) | | <p>2nd month And 3rd month And 4th month</p> |
|--|-------|--|---|-----------------------|--|---|

| | | | | | | |
|--|--|--|---|--|--|--|
| | | | <p>row/column, load data from a text file, store matrix data to a text file, finding out variables and their features in the current scope.</p> <p>6. Perform basic operations on matrices (like addition, subtraction, multiplication) and display specific rows or columns of the matrix.</p> <p>7. Perform other matrix operations like converting matrix data to absolute values, taking the negative of matrix values, adding/removing rows/columns from a matrix, finding the maximum or minimum values in a matrix or in a row/column, and finding the sum of some/all elements in a matrix.</p> <p>8. Create various type of plots/charts</p> | | | |
|--|--|--|---|--|--|--|

| | | | | | | |
|--|--|--|--|--|--|--|
| | | | <p>like histograms, plot based on sine/cosine function based on data from a matrix. Further label different axes in a plot and data in a plot.</p> <p>9. Generate different subplots from a given plot and color plot data.</p> <p>10. Use conditional statements and different type of loops based on simple example/s.</p> <p>11. Perform vectorized implementation of simple matrix operation like finding the transpose of a matrix, adding, subtracting or multiplying two matrices.</p> <p>12. Implement Linear Regression problem. For example, based on a dataset comprising of existing set of prices</p> | | | |
|--|--|--|--|--|--|--|

| | | | | | | |
|--|--|--|--|--|--|--|
| | | | <p>and area/size of the houses, predict the estimated price of a given house.</p> <p>13. Based on multiple features/variables perform Linear Regression. For example, based on a number of additional features like number of bedrooms, servant room, number of balconies, number of houses of years a house has been built – predict the price of a house.</p> <p>14. Implement a classification/ logistic regression problem. For example based on different features of student’s data, classify, whether a student is suitable for a particular activity. Based on the available dataset, a student can also implement another classification problem like checking whether an email is spam or not.</p> | | | |
|--|--|--|--|--|--|--|

| | | | | | | |
|-------------|--------------------------------|--|---|--|----|-----------------------|
| | | | <p>15. Use some function for regularization of dataset based on problem 14.</p> <p>16. Use some function for neural networks, like Stochastic Gradient Descent or back propagation - algorithm to predict the value of a variable based on the dataset of problem 14.</p> | | | |

| | | | | | | |
| | C13P: Artificial Intelligence Lab | prolog program | <p>1. Write a prolog program to calculate the sum of two numbers.</p> <p>2. Write a prolog program to find the maximum of two numbers.</p> <p>3. Write a prolog program to calculate the factorial of a given number.</p> <p>4. Write a prolog program to calculate the nth Fibonacci number.</p> <p>5. Write a prolog program, insert_nth(item, n, into_list, result) that asserts that result is the list into_list with item inserted as the n'th element into every list at all levels.</p> <p>6. Write a Prolog program to remove the Nth item from a list.</p> <p>7. Write a Prolog</p> | Mr. Suman Mondal (Assistant Professor) | 60 | 1 st month And 2 nd month And 3 rd month And 4 th month |

| | | | | | | |
|--|--|--|--|--|--|--|
| | | | <p>program, remove- nth(Before, After) that asserts the After list is the Before list with the removal of every n'th item from every list at all levels</p> <p>8. Write a Prolog program to implement append for two lists.</p> <p>9. Write a Prolog program to implement palindrome(List).</p> <p>10. Write a Prolog program to implement max(X,Y,Max) so that Max is the greater of two numbers X and Y.</p> <p>11. Write a Prolog program to implement maxlist(List,Max) so that Max is the greatest number in the list of numbers List.</p> <p>12. Write a Prolog program to</p> | | | |
|--|--|--|--|--|--|--|

| | | | | | | |
|--|--|--|--|--|--|--|
| | | | <p>implement <code>sumlist(List,Sum)</code> so that <code>Sum</code> is the sum of a given list of numbers <code>List</code>.</p> <p>13. Write a Prolog program to implement two predicates <code>evenlength(List)</code> and <code>oddlength(List)</code> so that they are true if their argument is a list of even or odd length respectively.</p> <p>14. Write a Prolog program to implement <code>reverse(List,Reversed List)</code> that reverses lists.</p> <p>15. Write a Prolog program to implement <code>maxlist(List,Max)</code> so that <code>Max</code> is the greatest number in the list of numbers <code>List</code> using <code>cut</code> predicate.</p> <p>16. Write a Prolog program to implement GCD of</p> | | | |

| | | | two numbers. 17. Write a prolog program that implements Semantic Networks/Frame Structures | | | |
| | C14T: Computer Graphics | Unit-1. Introduction | Basic elements of Computer graphics, Applications of Computer Graphics. | Mr. Arnab Chakraborty (SACT) | 60 | 1 st month |
| | | Unit-2. Graphics Hardware | Architecture of Raster and Random scan display devices, input/output devices. | | | 1 st month |
| | | Unit-3. Fundamental Techniques in Graphics | Raster scan line, circle and ellipse drawing, thick primitives, Polygon filling, line and polygon clipping algorithms, 2D and 3D Geometric Transformations, 2D and 3D Viewing Transformations (Projections- Parallel and Perspective), Vanishing points. | | | 2 nd month |
| | | Unit-4. Geometric Modeling | Representing curves & Surfaces. | | | 2 nd month |
| | | Unit-5. Visible | Hidden surface elimination. | | | 3 rd month |

| | | | | | | |
|--|-----------------------------|---------------------------|--|------------------------------|----|--|
| | | Surface determination | | | | |
| | | Unit-6. Surface rendering | Illumination and shading models. Basic color models and Computer Animation. | | | 4 th month |
| | C14P: Computer Graphics Lab | List of Practical: | <p>1. Write a program to implement Bresenham's line drawing algorithm.</p> <p>2. Write a program to implement mid-point circle drawing algorithm.</p> <p>3. Write a program to clip a line using Cohen and Sutherland line clipping algorithm.</p> <p>4. Write a program to clip a polygon using Sutherland Hodgeman algorithm.</p> <p>5. Write a program to apply various 2D transformations on a 2D object (use homogenous coordinates).</p> | Mr. Arnab Chakraborty (SACT) | 40 | 1 st month And 2 nd month And 3 rd month And 4 th month |

| | | | | | | |
|--|--------------------------------|--------------|--|--|----|-----------------------|
| | | | <p>6. Write a program to apply various 3D transformations on a 3D object and then apply parallel and perspective projection on it.</p> <p>7. Write a program to draw Hermite/Bezier curve.</p> | | | |
| | DSE3T: Numerical Methods | Introduction | <p>Floating point representation and computer arithmetic, Significant digits, Errors: Round-off error, Local truncation error, Global truncation error, Order of a method, Convergence and terminal conditions, efficient computations</p> <p>Bisection method, Secant method, Regula-Falsi method Newton- Raphson method, Newton's method for solving nonlinear systems Gauss elimination method (with row pivoting) and Gauss-Jordan method,</p> | Mrs. Sova Pal (Bera) (Associate Professor) | 60 | 1 st month |
