<b>Course- 2.3.2</b>	<b>Advanced Research Methods (Including Statistical Techniques) (2 credits)</b>	<b>Internal Assessment 15 marks</b>	<b>External Assessment 35 marks</b>	<b>Teachers Name</b>  <b>Teaching Hours</b>
<b>Objectives:</b>	After completion of the course the students will be able to- <b>1. To develop understanding and skills in using various quantitative and qualitative techniques of data analysis.</b>			

	<p>2. To develop understanding and skills to analyze &amp; interpret data.</p> <p>3. To develop competencies in Research reporting &amp; Research Synthesizing.</p>	
<b>Unit-I</b>	<p><b>Quantitative Data Analysis-part I</b></p> <p>- Scales of Measurement</p> <p>- Descriptive Statistics: Data Tabulation, Frequency Distribution, Graphical Representation, Measures of Central Tendency and Variability, Percentile, Percentile Rank &amp; Ogive, Standard Score, Probability, Normal Probability Curve and its Properties, Deviation from normality and underlying causes, Meaning, Computation and Interpretation of Linear correlation, Product-Moment Correlation, Rank Order Coefficient of Correlation, Coefficients of Determination and Alienation.</p>	AM 4H
<b>Unit II</b>	<p><b>Quantitative Data Analysis-part II</b></p> <ul style="list-style-type: none"> <li>● Inferential Statistics: Logic of inferential process, Cause and Effect relation, Single Cause, Multiplicity of Causes, Testing hypothesis- Null or Directional, Qualitative &amp; Statistical Difference and Relationship Testing, Meaning of Statistical Significance, Levels of Significance, Two types of Error, Power of a Test, One and Two Tailed Tests, Degrees of Freedom, Testing significance of Difference between Means and other Statistics, t-test, ANOVA, ANCOVA, Chi-Square Test, Inference and Generalization, Emerging Laws, Principles and Theories</li> <li>● Utilizing Software Packages for quantitative analysis (Use of SPSS, MS Stats, MS Excel)</li> </ul>	AG 4H
<b>Unit III</b>	<p><b>Qualitative Data Analysis</b></p> <p>- Techniques of qualitative data analysis- Content Analysis, Classification, Categorization, Triangulation, Frequency and Percentage Analysis, Trend Analysis, Utilization of Corroborative evidences</p> <p>- Utilizing Packages for qualitative analysis (Use of AnthroPack)</p>	TB2 4H
<b>Unit IV</b>	<p><b>Writing of Research Report &amp; Synthesizing Research</b></p> <p>- Mechanics of Reporting Quantitative/Qualitative Research- Format, Language, Style, Bibliography/Referencing, Appendix, Variation in the scheme of Reporting</p> <p>- Synthesizing Research - Quantitative, Qualitative, Trend Analysis, Narrative Approach, Vote Counting Method, Combined Significance Method, Effect Magnitude Method.</p>	TB3 4H
<b>Practicum</b>	<p>The students will be required to present a term paper on any one topic in the content.</p> <p>They will also be assessed on the basis of statistical analysis of the given data and statistical practice</p>	TB3, AG, AM, TB2 32H

<b>Semester-III</b>	<b>Internal Assessment 290 and External Assessment 210</b>	<b>Total -500</b>
---------------------	--	-------------------

### SEMESTER IV (20 credits)

<b>Course- 2.4.1</b>	<b>Perspectives, Issues and Research in Teacher Education</b>	<b>Internal Assessment</b>	<b>External Assessment</b>
--------------------------	---	--------------------------------	--------------------------------

	(4credits)	30	70	Teachers Name
				Teaching Hours
<b>Objectives</b>	After going through this course the student teachers will be in a position to: <ul style="list-style-type: none"> <li>• Develop a holistic perspective of teacher education in the country</li> <li>• Analyse the implications of education policies on reforms in teacher education and its norms and guidelines.</li> <li>• Identify the problems of teacher education programmes and teacher effectiveness.</li> <li>• Understand the significance of research for knowledge generation in the area of teaching and teacher development with methodical perspectives.</li> </ul>			
<b>Unit I</b>	<b>Teacher Education as Professional Education</b> <ul style="list-style-type: none"> <li>• Teacher development-concept, factors influencing teacher development- personal and contextual. Professionalism in Teacher Education</li> <li>• Teacher education in India: historical perspective</li> <li>• Approaches to teacher development- Traditional, Academic, Personalistic, Competency, Social Reconstructionist, synthetic view.</li> <li>• NCTE: Structure and Functions.</li> <li>• Scope of Teacher Education Programmes as enlisted in NCTE Regulations, Stage specific and area specific teacher education programme.</li> </ul>			<b>AG 9H</b>
<b>Unit II</b>	<b>Structure and Management of Teacher Education</b> <ul style="list-style-type: none"> <li>• Universalisation of elementary education and universalisation of secondary education and its implications for teacher education at school stage. Viz. Pre-primary, elementary, Secondary, Higher Education, Physical education, Music Education, Visual arts Education, Special Education ect.</li> <li>• Preparing teachers for different context of School Education. State Level planning, Demand and Supply of Qualified Teachers at different stages.</li> <li>• NCTE Norms and Standards for Teacher Education Programmes at elementary level, secondary level and masters' degree level.</li> <li>• Management of Teachers at State level; Qualification of Teachers, Teacher recruitment Policies, Professional development of Teachers and vertical mobility of teachers.</li> </ul>			<b>SMI 9H</b>

<p><b>Unit III</b></p>	<p><b>Problems and Issues in Teacher Education</b></p> <ul style="list-style-type: none"> <li>● Problem of pre-service teacher education: Bureaucratisation; inadequate planning; privatization and commercialization, economics of teacher education.</li> <li>● Challenges of professional development of teachers such as its relevance to school education. Improperly qualified teacher educators, assurance of quality of teacher education programmes.</li> <li>● Teacher educators' Leadership competencies in planning, implementation and evaluation of pre-service and in-service teacher education programmes.</li> <li>● Issues related to enhancing teacher educators competency.</li> <li>● Networking of teacher education; Teacher Education Institutions;</li> </ul>	<p><b>AM 9H</b></p>
------------------------	--	-------------------------

	Universities; Government agencies; Regulatory bodies and community for preparing teachers for different levels of school education.	
<b>Unit IV</b>	<p><b>Research and Development in Teacher Education</b></p> <ul style="list-style-type: none"> <li>● Education of Teacher Educators; Preparatory Programme and Professional development of Teacher Educators at different stages.</li> <li>● Paradigms for research and Teaching: Gage, Doyle and Shulman.</li> <li>● Research and effectiveness of teacher education programme.</li> <li>● NAAC-NCTE criteria for assessment of Teacher Education Institutions.</li> <li>● Methodological issues of research in teacher education - Theoretical research versus Applied research, Participatory action research and teaching effectiveness.</li> <li>● Trends of research in Teacher education.</li> </ul>	<b>AM 10H</b>
<b>Practicum</b>	<ul style="list-style-type: none"> <li>● Study of the annual report of the SIEMAT/SCERT/RIE/NCERT/NUEPA, universities teacher education institutions, ASC etc.</li> <li>● Describe any current practice in teacher education with its background.</li> <li>● A review of research in any one area of research in teacher education and write the policy implications.</li> <li>● Review of research article in teacher education and implications for practitioner teachers etc.</li> </ul>	AM, AG 32H

**Course - 2.4.5****Dissertation ( Report Writing and Viva Voce)(Marks100 and Credits4)**All Teachers **128H****Brief Overview**

The dissertation is a compulsory course of 8 credits and 200 marks; however, 2 credits 50 mark each have been earmarked for dissertation related work in Second and Third Semesters. Thus the course on dissertation in Fourth Semester will carry the remaining 4 credits and 100 marks. The purpose of dissertation is to provide basic understanding to prospective teacher-educators (with close mentorship/guidance of a faculty member) in how to plan and conduct a research, and write a thesis. It is also a space where students come to see and draw linkages between education theory (transacted through taught courses) and research.

**Expected Learning Outcomes**

After the completion of their dissertation the student-teachers will be able to:

- Establish linkages between education theory (transacted through taught courses) and research.
- Develop various skills of: articulating and formulating a research problem and research questions.
- articulate and formulate a research problem,
- formulate objectives, hypotheses and research questions
- Design and execute the research plan, which includes engaging with the relevant body of literature and theory(/ies).
- develop various tools and techniques for data collection
- Understand the primary and secondary sources of data.
- learn the techniques and strategies for the analysis and interpretation of data in quantitative and qualitative research
- Learn the intricacies of writing of research report including footnotes, references and bibliography etc.
- Take up independent research projects.

**Course Content**

The specialization area or perspectives or teacher education from which the topic for dissertation has been selected will broadly constitute the content area for the dissertation paper. Besides, the content will also include all topic covered under two courses on research methods and statistics covered in first and third semester.

**Selection of Topic for Dissertation**

The dissertation should preferably be in the area of specialization that a student opts or in the areas introduced in the perspective courses. In case the student decides to undertake a topic from perspective or any other areas it must be ensured that the topic selected for dissertation has a direct bearing on the area of his/her specialization. Selection of topic for dissertation should be done in the beginning of Second Semester.

**Process of Conduct of Dissertation**

While the product or the outcome of this component (i.e. the thesis) is important, the process through which it is arrived at is equally (if not more) significant. This makes a case for this component to be guided or mentored closely by a faculty mentor. Various skills that are expected to be developed

through this component include: articulating and formulating a research problem and research questions, designing a plan to study it, executing the plan (which includes engaging with the relevant body of literature and theory (ies), analyzing and writing the findings in an academic fashion, and presenting the work. However, this should not be seen as implying that the dissertation must be field-based. It may be a long essay/treatise.

### **Submission of Dissertation**

While a dissertation may be submitted at the end of the Semester 4 of the programme, the process of arriving at it should begin early as suggested below:

#### **i) Second Semester:**

Students are required to select topic for their dissertation and prepare & present a detailed research proposal in second semester which will carry 2 Credits, and 50 marks. Evaluation of the research proposal will be done internally by board examiners comprising of at least two faculty members from within the institution.

#### **ii) Third Semester:**

Review of Related literature and Development of Tools carrying 2 Credits, and 50 marks. This component should also be examined by a board of at least two to three

#### **iii) Fourth Semester:**

Conducting of Field Study/Intervention Study/Literary Work, Data Analysis, Interpretation and Writing of research Report (4 Credits and 100 marks).

### **Support to Students**

For successful completion of dissertation within the time frame the department/institution offering the M.Ed. programme should apart from mentoring and supervision should also organize the following :

- a) Orientation programme to explain the expectations, processes, roles of the prospective teacher educators and research mentors,
- b) Workshops on developing research proposals, doing fieldwork, taking field-notes, referencing and editing, etc.
- c) Research seminars (where the M.Ed. student's present work-in-progress and other researchers are invited to present their work) should be organized.
- d) Sessions guiding students to understand the interfaces between theory (transacted through taught courses) and the dissertation must also be planned. These could be in the form of special tutorials in relevant courses.

### **Concept Note**

It is strongly recommended that a department/institution offering the M.Ed. programme, develop a concept note on the dissertation component that clearly specifies the expectations, assessment rules and procedures, and guidelines for students. This note should also include aspects like style sheet, and the word limit for the dissertation (ideally between 15,000 to 20,000 words). While a set of clearly laid guidelines should be put in place for this component, there should be an openness in terms of allowing and encouraging various research styles, areas, kinds of problems, and writing styles.

### **Assessment of Rubrics**

The evaluation of the dissertation in fourth semester be done by an external examiner to be decided by the affiliating university from the panel of examiners approved by its academic bodies. The evaluation of the dissertation shall be based on the quality of research report carrying 50 marks, and comprehensive viva-voce examination carrying 50 marks.
