## Yogoda Satsanga Palpara Mahavidyalaya

## DEPARTMENT OF GEOGRAPHY TEACHING PLAN

**SESSION: 2020-2021** 

| Semester | Paper                                    | Ur            | nit/Module  | Teacher                | No. of lectures | To be completed by                           |
|----------|--|---------------|---|------------------------|-----------------|--|
| and      | C1T: Geotectonic<br>and<br>Geomorphology | Geotectonics  | Earth's tectonic and structural evolution with reference to geological time scale   | n                      | 10              | 1 <sup>st</sup> Month                        |
|          |  |               | Earth's interior with<br>special reference to<br>seismology. Isostasy<br>Models of Airy and Pratt   | Sardar                 |                 | 2 <sup>nd</sup> month                        |
|          |  |               | Plate Tectonics: Processes at constructive, conservative, destructive margins and hotspots; resulting landforms Folds and Faults—origin and types | Pragna<br>Bhattacharya | 10              | 3 <sup>rd</sup> month  4 <sup>th</sup> month |
|          |  | Geomorphology | Degradational processes:<br>Weathering, mass<br>wasting and resultant<br>landforms  | Sudipta Das            | 4               | 1 <sup>st</sup> Month                        |
|          |  |               | Processes of entrainment, transportation and deposition by different geomorphic agents. Role of humans in landform development.                   | Swapan Mishra          |                 | 2 <sup>nd</sup> month                        |
|          |  |               | Development of river<br>network and landforms<br>on uniclinal and folded<br>structures  | Ranjan Khatua          | 8               | 3 <sup>rd</sup> month                        |
|          |  |               | reference to Granite and<br>Basalt  | Binod Sardar           | 2               | 4 <sup>th</sup> Month                        |
|          |  |               | Karst landforms: Surface and sub-surface. Coastal processes and landforms.  | Arpita<br>Samanta      | 4               | 4 <sup>th</sup> Month                        |
|          |  |               | Glacial and fluvio-glacial processes and landforms; fluvio-glacial landforms  | Pragna<br>Bhattacharya | 4               | 5 <sup>th</sup> Month                        |

|            |   |   | Aeolian and fluvio-                                       | Arpita   | 4                     | 1 <sup>st</sup> month                        |
|------------|---|---|---|--|-----------------------|--|
|            |   |   | aeolian processes and landforms; fluvio-aeolian processes | Samanta  |                       |  |
|            |   | Models on landscape evolution   |   | Ranjan Khatua  | 5                     | 2 <sup>nd</sup> month                        |
|            |   |   | Views of Penck and Hack                                   | Sudipta Das  |                       | 3 <sup>rd</sup> and 4 <sup>th</sup><br>month |
| Semester-1 | C2T: Cartographic<br>Techniques           | Maps: Classification of a map   | and types. Components                                     | Arpita Samanta   | 8                     | 1 <sup>st</sup> month                        |
|            | Concept and application of scales         | Plain, comparative,<br>Diagonal   | Swapan<br>Mishra  |  | 2 <sup>nd</sup> month |  |
|            |   | Vernier   | Ranjan Khatua   |  | 1 <sup>st</sup> month |  |
|            |   | Coordinate systems:   | Polar and rectangular. Concept of geoid and spheroid      | Pragna<br>Bhattacharya                                 |                       | 2 <sup>nd</sup> month                        |
|            |   | Concept of generating globe.  |   | Binod Sardar   | 12                    | 3 <sup>rd</sup> and 4 <sup>th</sup><br>month |
|            |   | Grids: angular and linear systems of measurement  |   | Ranjan Khatua  |                       |  |
|            |   | Bearing: Magnetic<br>and true, whole-circle<br>and reduced.<br>Map projections:<br>Classification,                            | -   | Sudipta Das  | 18                    | 1 <sup>st</sup> month                        |
|            |   | properties and uses. Concept and significance of UTM projection.  |   | Binod Sardar<br>Swapan Mishra                          |                       |  |
|            |   | Basic concepts of surveying and survey equipment:   | Theodolite  | Pragna<br>Bhattacharya<br>Swapan Mishra<br>Sudipta Das |                       |  |
|            |   | Survey of India<br>topographical maps:<br>Reference scheme of<br>old and open series.<br>Information on the<br>margin of maps | Abney level, Clinometer                                   | Arpita Samanta   | 2                     | 2 <sup>nd</sup> month                        |
|            | C2P:<br>Cartographic<br>Techniques<br>Lab | Graphical construction of scales  | Plain, comparative<br>Diagonal                            | Arpita Samanta<br>Swapan Mishra                        | 6                     | 1 <sup>st</sup> month                        |
